Dear Mr. Knapp:

GAR Industries
 9215 Riverview

Thank you for your letter regarding emissions from the above facility and the results of your investigation.

In light of your determination, we will probably not schedule a special investigation; however, we will have an inspector visit this facility the next time we have scheduled activities in the St. Louis area.

Sincerely yours,

Earl J. Stephenson
 Director
 Enforcement Division

RE: GAF Industries
.. 9215 Riverview

Dear Sir:

A complaint that "asbestos dust intense inside the plant and also vented outside" was referred to our Division by the Missouri Department of Natural Resources.

We referred that portion of the complaint that concerned asbestos dust inside the plant to the St. Louis Health Division for handling as a potential industrial hygiene problem.

Our investigation of emissions from the plant to ambient air showed the only visible emission to be from an exhaust fan from the northeast corner of the plant building. So far as we can determine this emissions did not contain asbestos and is not in violation of our ordinance requirements.

Therefore, this matter is being referred to your agency for whatever action you deem appropriate.

Very truly yours,

Richard C. Knapp, Chief
Field Enforcement Section
Division of Air Pollution Control
